

# ProTect<sup>1000</sup><sup>TM</sup>

Dramatically increases the life  
and reliability  
of medical handpieces.

Fischer is a trademark of W.W. Fischer S.A.

# Protect<sup>1000</sup>

Silicone cable assemblies  
engineered for long-life.

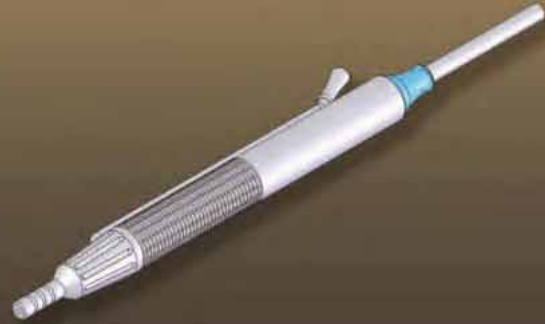

A breakthrough technology that greatly  
extends autoclave life.

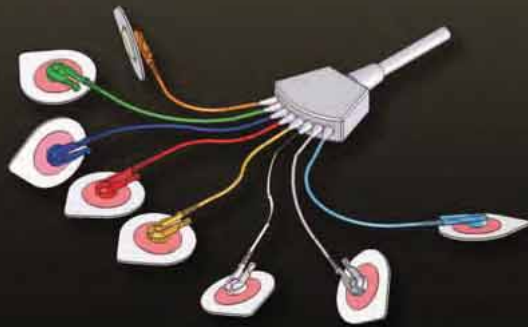

# Protect<sup>1000</sup>

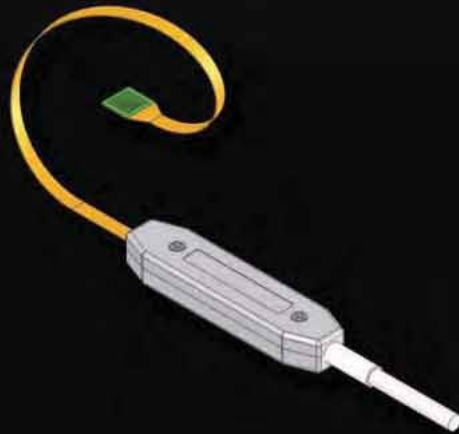

The perfect solution for demanding applications like.....

**Powered  
Surgical  
Instruments**

**Patient  
Monitoring**

**Medical  
Devices**

 **WOVEN ELECTRONICS<sup>®</sup>**

**Facilities:**

Woven Electronics products are designed and manufactured at this modern 100,000 square foot facility located in Greenville, South Carolina, USA. We also have a facility in Salisbury, United Kingdom.

In addition to a full line of Electronics Cable Assemblies, Woven also manufactures a wide range of cable assemblies to meet the demands of diverse markets throughout the world. Contact your local representative or inside sales team for additional information.

**Harnesses:** Woven's unique weaving techniques can yield cable harnesses that solve system problems.

**Probes:** Custom probes made to your cost and performance requirements.

**Sensors:** Woven's Engineers can design your custom sensor and cable assembly.

**Custom Cables:** Woven can design your custom cable assemblies including cable, backshells and complete interconnect design
